

TRAINING LOOP · updates A and B only, W_0 stays frozen

1 forward pass

2 loss $\mathcal{L} = \text{loss}(h, y)$

3 backward: $\partial \mathcal{L} / \partial A, \partial \mathcal{L} / \partial B$

4 $A \leftarrow A - \eta \cdot \partial \mathcal{L} / \partial A$

🔄 repeat per batch · W_0 never changes · merge into W' to deploy
